AKSHAT KUMAR SRIVASTAVA

Python Backend Developer | AI Automation | Django | FastAPI | Celery | AWS

+91-9936382927 • mailto:akshsvt123@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Computer Science graduate and Python Backend Developer with hands-on experience building and debugging production-grade SaaS and AI automation systems. Experienced in Python, Django, Django REST Framework, FastAPI, PostgreSQL, Celery, Redis, Docker and AWS, with practical exposure to asynchronous processing, REST APIs, email infrastructure and distributed workflows. Worked on Polluxa SalesTech, a production SaaS platform involving email outreach, lead management, sender/inbox workflows, warm-up and email deliverability, and Newton-AI, an AI-powered LinkedIn conversational SDR system involving lead engagement, intent detection, automated conversations, lifecycle management and human handoff workflows.

PROFESSIONAL EXPERIENCE

Gravity Engineering Services — Python Backend Developer

June 2026 – Present

Python • Django • Django REST Framework • FastAPI • PostgreSQL • Celery • Redis • Docker • Linux • Git

Polluxa SalesTech — Production SaaS Platform

- Developed and maintained backend APIs and business logic for a production SaaS platform using Django and Django REST Framework.
- Worked across core modules including Email, Outreach, Leads, Pipeline, Senders, Inbox, Templates, Warm-up and Deliverability.
- Developed and enhanced asynchronous workflows using Celery and Redis for background processing and automated email operations.
- Worked on email warm-up and deliverability workflows, including task execution, sending logic and reconciliation between email sending and mailbox activity.
- Investigated complex production issues across the API → service → database → Celery → Redis → SMTP/IMAP workflow.
- Debugged asynchronous task execution, Redis queue behaviour and email integration issues involving SMTP and IMAP.
- Worked with PostgreSQL for database operations, backend business logic and data investigation.
- Implemented and enhanced backend functionality for email deliverability analysis and before/after warm-up comparison.
- Worked on REST API integration between frontend and backend services and collaborated through Git/GitHub-based development workflows.

Newton-AI — AI-Powered LinkedIn SDR Automation | Video

- Worked on Newton-AI, a FastAPI/Celery-based AI automation system integrated with the SalesTech platform.
- Worked on automated LinkedIn lead engagement and conversational SDR workflows designed to qualify and progress prospects through conversations.
- Implemented and investigated conversation workflows involving interest detection, intent classification, early exits, lead qualification and lifecycle management.
- Worked on automated handling of conversational states including interested, not interested, irrelevant, job seeker, handed-off and ghosted leads.
- Worked on human handoff workflows for leads requiring sales intervention.
- Investigated reliability across asynchronous FastAPI, Celery and scheduled outreach workflows.
- Worked on inbound webhook reliability and automated conversation-processing flows.
- Analyzed safeguards to prevent unnecessary replies to disqualified, handed-off or inactive leads.

AI Lead Generation & Enrichment Automation | Github

- Worked on automated B2B lead discovery, company research and decision-maker enrichment workflows.
- Built structured workflows for identifying target companies and relevant decision-makers based on industry, geography, company size and job-title criteria.
- Worked on lead enrichment involving company information, professional contacts and contact email discovery.
- Processed and validated large-scale lead datasets while maintaining structured company/person relationships.
- Worked on email verification and data-quality workflows for large outreach datasets.
- Investigated email validity using syntax validation, domain/MX checks and external email verification services.
- Worked with Redis-based caching and verification workflows to reduce unnecessary repeated email validation operations.

PROJECTS

AI-Powered Fake Review Detection System

Python • Flask • Scikit-Learn • NLP • Machine Learning

- Developed an AI-powered platform for detecting potentially fake reviews using Natural Language Processing and Machine Learning.
- Implemented TF-IDF vectorization and Logistic Regression for review classification.
- Developed REST-based backend services using Flask for real-time review analysis.
- Added confidence scoring and bulk review analysis functionality and generated automated analytics reports.

Real-Time Visitor Analytics System

AWS Lambda • DynamoDB • API Gateway • CloudWatch • IAM

- Designed and deployed a serverless visitor analytics system using AWS Lambda, DynamoDB and API Gateway.
- Built REST APIs for real-time visitor event collection and processing.
- Implemented IAM-based security controls following least-privilege principles.
- Configured CloudWatch monitoring, logging and performance tracking.

NewsXStudy — Full-Stack News Aggregator & Study Assistant

React.js • Node.js • Express.js • MongoDB • JavaScript

- Developed a full-stack news aggregation and study-assistance platform using React.js, Node.js, Express.js and MongoDB.
- Implemented user authentication, bookmarking, category-based filtering and personalized news search.
- Integrated external APIs for dynamic real-time news content and developed a study assistant module with productivity functionality.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL

Backend Development: Django, Django REST Framework, FastAPI, Node.js, Express.js, REST APIs

AI & Automation: AI Automation, Conversational AI, NLP, Machine Learning, Lead Enrichment, LinkedIn Automation

Async & Distributed Systems: Celery, Redis, Background Jobs, Task Queues, Webhooks

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Cloud & Infrastructure: AWS EC2, S3, Lambda, API Gateway, IAM, VPC, CloudWatch, Docker, Linux

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript

Developer Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

EDUCATION

Babu Banarasi Das University — Lucknow, India **2022 – 2026**

Bachelor of Technology — Computer Science & Engineering | CGPA: 8.97/10 — First Division with Honors

- Secured 25th Rank in 1st Year
- Awarded scholarship for academic excellence

CERTIFICATIONS & TRAINING

- AWS Cloud Computing Training — Hands-on Practical Training
- AWS Solutions Architect – Associate — Currently Preparing
- Full Stack Java Development — Training

ACHIEVEMENTS & LEADERSHIP

- Team Lead, NSS Photography Team — Coordinated photography coverage for 5+ university events.
- Participated in TechXplore, a university-level coding and technology competition.
- 1st Place — College-Level Gaming Competition.
- Volunteer for university technical and cultural events.
- Regularly practice Data Structures & Algorithms on LeetCode and GeeksforGeeks.
